Paper II – ENGLISH

Time : Three hours

Maximum : 100 marks

SECTION A — ($10 \times 2 = 20$ marks)

Answer ALL the questions.

1. Correct the errors and rewrite the sentences.
 - (a) I will seeing you tomorrow.
 - (b) I play football tomorrow.
2. Correct the errors and rewrite the sentences.
 - (a) I don't can sing.
 - (b) I would like to can travel more.
3. Correct the errors and rewrite the sentences.
 - (a) I promise I pay you tomorrow.
 - (b) He should to work harder.

4. Complete the sentence using, any, somebody, anybody, something or anything.
- (a) Is there ————— I can do?
 - (b) There's ————— waiting to see you.
5. Put in the right kind of infinitive:
- (a) I'd like ————— home early today. (go)
 - (b) I'd like ————— her face when she opens the letter. (see)
6. Complete the following sentences with the correct tense of the verbs given in brackets
- (a) ————— you swim? (may, can, shall)
 - (b) I ————— go now. (shall, would, must)
7. Give the synonyms of:
- (a) Liberty
 - (b) Exceptional
8. Give one-word substitute:
- (a) A person who lives outside their native country
 - (b) One who loves mankind

9. Use the word Trek in a meaningful sentence.
10. Match the following words with their meanings.

S.No.	Words	Meanings
1	Literacy	Short version of a story or tale that has a moral lesson, the characters that are usually animals
2	Fable	The leading character in a literary work
3	Protagonist	An experienced and trusted advisor who guides the students
4	Mentor	The ability to read and write

SECTION B — ($5 \times 7 = 35$ marks)

Answer ALL the questions in about 150 words.

11. Read the following passage and answer the questions given.

Many great inventions are initially greeted with ridicule and disbelief. The invention of the airplane was no exception. Although many people who heard about the first powered flight on December 17, 1903 were excited and impressed, others reacted with peals of laughter. The idea of

flying an aircraft was repulsive to some people. Such people called Wilbur and Orville Wright, the inventors of the first flying machine, impulsive fools. Negative reactions, however, did not stop the Wrights. Impelled by their desire to succeed, they continued their experiments in aviation.

Orville and Wilbur Wright had always had a compelling interest in aeronautics and mechanics. As young boys they earned money by making and selling kites and mechanical toys. Later, they designed a newspaper-folding machine, built a printing press, and operated a bicycle-repair shop. In 1896, when they read about the death of Otto Lilienthal, the brothers' interest in flight grew into a compulsion.

Lilienthal, a pioneer in hang-gliding, had controlled his gliders by shifting his body in the desired direction. This idea was repellent to the Wright brothers, however, and they searched for more efficient methods to control the balance of airborne vehicles. In 1900 and 1901, the Wrights tested numerous gliders and developed control techniques. The brothers' inability to obtain enough lift power for the gliders almost led them to abandon their efforts.

After further study, the Wright brothers concluded that the published tables of air pressure on curved surfaces must be wrong. They set up a wind tunnel and began a series of experiments with model wings. Because of their efforts, the old tables were repealed in time and replaced by the first reliable figures for air pressure on curved surfaces. This work, in turn, made it possible for the brothers to design a machine that would fly. In 1903 the Wrights built their first airplane, which cost less than \$1,000. They even designed and built their own source of propulsion-a lightweight gasoline engine. When they started the engine on December 17, the airplane pulsed wildly before taking off. The plane managed to stay aloft for 12 seconds, however, and it flew 120 feet.

By 1905, the Wrights had perfected the first airplane that could turn, circle, and remain airborne for half an hour at a time. Others had flown in balloons and hang gliders, but the Wright brothers were the first to build a full-size machine that could fly under its own power. As the contributors of one of the most outstanding engineering achievements in history, the Wright brothers are accurately called the fathers of aviation.

Questions

- (a) Explain the term, 'repulsive' in connection with the idea of flying an aircraft.
 - (b) How did Orville and Wilbur Wright earn money?
 - (c) Why did the Wright brothers abandon their efforts?
 - (d) What is 'Lilienthal'?
 - (e) What efforts did the Wright brothers take to design a successful flying machine?
 - (f) Why are the Wright brothers called the fathers of aviation?
 - (g) The inventors of the first flying machine were considered as
 - (i) Intelligent (ii) fools (iii) leaders
 - (iv) ordinary men
12. Write a postcard to your parents while you are on a college trip to a place with historical significance.

13. (a) Explain the challenges faced by Birma Kunwar and Keshya during the Covid-19 pandemic.

Or

- (b) Compare and contrast Billy Collins' experiences as a tourist in Italy and his being in his homeland America.
14. (a) Construct a paragraph on the steps taken by the Government of Kerala to feed the migrant workers/guest workers from other states during the lockdown.

Or

- (b) Compare and contrast Bharathi and Tagore as writers as discussed by A R Venkatachalapathy.
15. (a) Explain the transformation of Kabul as reflected in Tara N Khan's extract *Return*.

Or

- (b) "Parle-G biscuits are India's comfort food during the pandemic." Do you agree with the statement? Summarize a few events from the essay as supporting evidence.

SECTION C — ($3 \times 15 = 45$ marks)

Answer the following in about 250 words.

16. Read the following narrative and answer the questions.

Pyramids are buildings mostly constructed out of stone in ancient times, which have a pyramid shape. The simplest ones have a square or rectangular base and four triangular sides which meet in a peak at the top. With this shape, most of the building's weight is at the bottom, which means that pyramids are very stable and could be built very high. Pyramids have been built by many people throughout history, mostly for religious reasons.

The Egyptians are the most famous culture to have built pyramids. They built them for about a thousand years, until around 1500 BC when they decided they were too expensive to build. The purpose of pyramids was as tombs for the Egyptian pharaohs. The Egyptians believed that their pharaohs were gods on earth, and that the best way to make sure they returned to the realm of the gods after death was by burying them inside a pyramid.

Egyptian pyramids had a main room where the pharaoh's mummified remains would be placed along with a large amount of treasure. The shaft which led to the burial chamber would be closed off after the pharaoh's remains were placed there to prevent robbers from stealing the treasure. The builders also placed various traps along the shaft to further prevent robbery, as well as false burial rooms which were empty to further confuse thieves. There would also be a narrow chute from the pharaoh's burial room to the outside, pointing at the stars, so the pharaoh's soul could exit the burial room and go up to heaven.

The Egyptians built more than a hundred pyramids, almost all of them near Cairo, on the west side of the Nile River (since the sun sets, or 'dies', in the west). These were usually lined with polished white stone, and topped off with a pyramidion-or capstone-made of gold or marble to make them gleam in the desert. This gleaming lining has since fallen away. The largest, the Pyramid of Khufu, built in 2560 BC, was the tallest building in the world until it was beaten by an English cathedral in 1311. It is known as the last remaining 7 Wonders of the Ancient World.

Egyptians weren't the only ones to build pyramids. On the other side of the Atlantic, the Mesoamerican peoples also built pyramids in what is today Mexico. These pyramids were not smooth like the Egyptian ones, but made of several tiers which got smaller as they got higher. They would usually have stairs on the sides, which led all the way to the top. Many had a temple or statue at the top.

The Mesoamerican pyramids were built by many different cultures. Some of the earliest, like the temple at Tikal, or El Castillo, were built by the Maya people at some point between 700 and 1200 AD. Others were built by the earlier pre-Colombian peoples in 250 AD. such as the Pyramids of the Sun and Moon in modern-day Mexico. They were discovered in an abandoned state by the Aztecs 1000 years after they were built. These cultures all had slightly different religions and different uses for their pyramids. Some Mesoamerican pyramids were tombs for kings. Others were religious shrines dedicated to specific gods or to planets. Others might have been used for human sacrifices. Many of the outside walls of these pyramids are covered with writing explaining various stories about the gods to the reader.

The Egyptian and Mesoamerican cultures were very different. They were on two different sides of the ocean, spoke different languages and separated by 2000 years of history. But they had one thing in common-they both used enormous pyramids to get closer to their respective gods.

Questions

- (a) Why did the Egyptians build pyramids for their king pharaoh? (2)
- (b) What was the difference between Mesoamerican pyramids and Egyptian ones? (2)
- (c) State which of the following statements are true or false (4)
 - (i) Pyramid of Khufu is the largest pyramid in the world.
 - (ii) Mesoamericans did not build pyramids.
 - (iii) Mesoamerican pyramids had a temple or statue at the top of the pyramid.
 - (iv) The builders of Egyptian pyramids installed traps to prevent the pharaoh's body from being tampered with by thieves

(d) Arrange the following sentences in the right order. (2)

(i) The Egyptian and Mesoamerican cultures used enormous pyramids to get closer to their respective gods.

(ii) The Egyptians built more than a hundred pyramids, near Cairo, on the west side of the Nile River

(iii) El Castillo, were built by the Maya people at some point between 700 and 1200 AD.

(iv) Pyramids are very stable and could be built very high.

(e) Match the words/terms with their meanings. (3)

S.NO.	Words	Meanings
1	mummified	Very big
2	enormous	Kingdom
3	realm	Preserving a dead body by embalming and wrapping it in a cloth

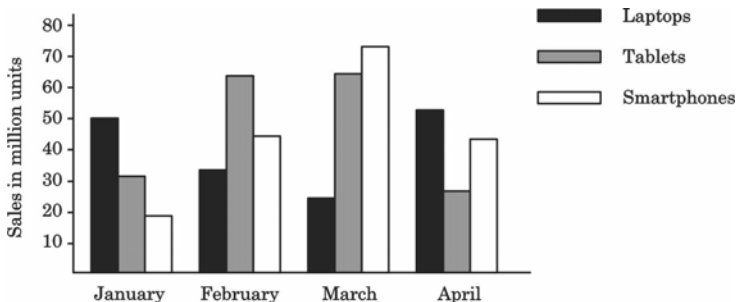

(f) Complete the sentences with the correct option. (2)

(i) The Egyptians built their pyramids near _____ river. (Nile/Amazon/Mississippi)

(ii) _____ discovered the pyramids in an abandoned state. (Egyptians/Azetscs/pre-Colombian)

17. (a) Write a brief report based on the graph presented below. (5)

The Online Sales of Smartphones, Laptops and Tablets in the First Quarter of 2019.

(b) Write a bio-sketch of your favourite personality. (10)

18. (a) Examine the inextricable link among food, people, and place highlighted in the text “On searching for a once-lost love”

Or

- (b) Analyze Malala Yousufzai’s journey of women’s education on the fateful day she was shot.
-
